### DETAILED ACTION

1. The notice of allowance mailed 5/10/05 is withdrawn by the examiner.

#### ***Claim Objections***

2. Applicant is advised that should claim 13 be found allowable, claim 12 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

#### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 3, 4 and 6-11 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No.

Art Unit: 1714

6,545,065. Although the conflicting claims are not identical, they are not patentably distinct from each other because the pigment combinations and the polymers are identical.

5. Claims 1-4 and 6-13 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,294,010. Although the conflicting claims are not identical, they are not patentably distinct from each other because the pigment combinations, the concentrations and the polymers are identical.

***Claim Rejections - 35 USC § 102***

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 1, 3, 4 and 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Merck Patent GmbH WO 98/03583, with Solms et al. 6,545,065 serving as its English translation.

8. Solms et al. teach applicant's pigment blend in claims 1, 11 and 12, coated pearl luster pigment and non-lustrous metal oxide coated mica pigment in claim 4, polymers in claim 6 and method of laser marking in claims 13-17. Plastic granules are shown in Examples 1 and 2. The difference between granules and pellets is nominal. And/or means either "and or" or "or" encompassing both alternatives. Applicant's claims are not novel.

9. Claims 1-4 and 6-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Pfaff et al. 6,294,010.

Art Unit: 1714

10. Pfaff et al. disclose aluminum oxide coated with titania and iron oxide in claims 1 and 2, mica coated with tin oxide doped with antimony in claims 7-10, polyethylene granules and pigment concentrations in Example 2 and laser marking in claims 14-17. Applicant's claims are not novel.

***Claim Rejections - 35 USC § 103***

11. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

12. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Merck Patent GmbH WO 98/03583, with Solms et al. 6,545,065 serving as its English translation, or Pfaff et al. 6,294,010.

13. Both references have been described already. It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to select applicant's ingredients from a list of equivalents.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
